Art Unit: 3728

1. Applicant's election of Group II, claims 3-7 in the reply filed on 7/15/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 1 and 2 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 3, the phrase "placed on its lower face in order to accommodate a packing" is confusion and indefinite because it is not clear whether applicant is claiming a packing or not. However, for the purpose of this office action, the Examiner is assuming the packing is not claimed in combination with the packaging. In claims 6 and 7, the phrase "or obtained according to the method of Claims 1 or 2" is indefinite and should be deleted from the claims.

Claim Rejections - 35 USC § 102

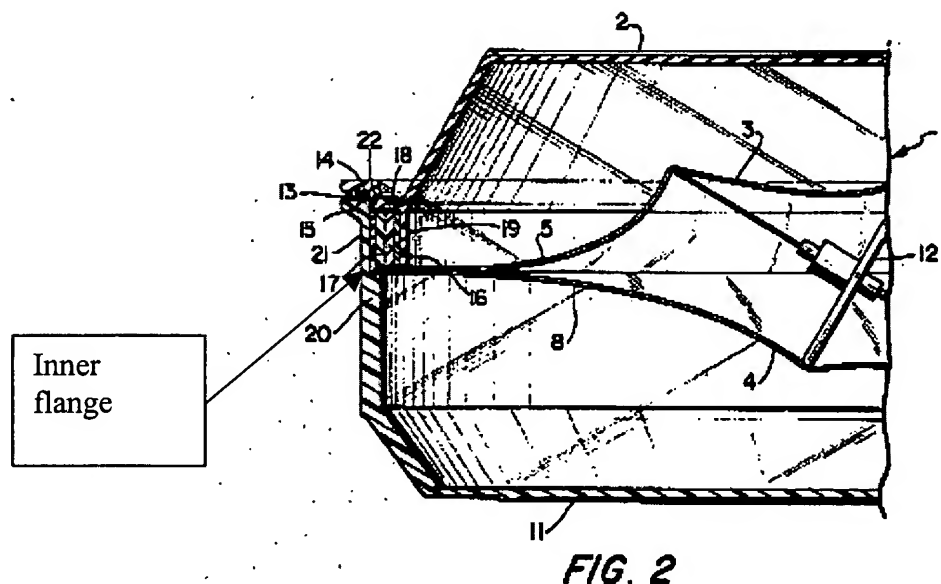

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3728

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 3, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Baillo (4,491,225). To the extent that the Examiner can determine the scope of the invention, Baillo discloses a packaging (1) for one or more products suspended on a stretch film comprising at least one tray (11) in the form of a thermoformed shell having a flat and horizontal inner peripheral flange adapted to receive a stand-alone subassembly including a support frame (16, 17) having an opening at its center and a stretch and shrink film (3, 4) formed from polyurethane fastened to the support frame to allow one or more products to be suspended through the opening. Baillo further discloses the film formed from polyurethane. The packaging of Baillo is inherently capable of receiving medical prostheses.

Art Unit: 3728

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baillod (4,491,225) in view of Cohen et al. (4,750,619; hereinafter Cohen'619). Baillod discloses the packaging (1) for one or more products suspended on the stretch film as above having all the limitations of the claims except for several shell-shaped trays. Cohen'619 shows a packaging comprising several trays (12, 14) for holding a stand-alone subassembly (42, 50) and closures (24, 34) for sealing the trays (Figure 3). It would have been obvious to one having ordinary skill in the art in view of Cohen'619 to modify the packaging of Baillod so the at least one tray comprises several shell-shaped trays with closures for better protecting the one or more products.
